

HSBC Insurance Brokers

Energy, Power and Utilities

Constantly generating new ideas

From wind farms to water treatment works, from power generation plants to meters at customers' premises, HSBC Insurance Brokers can provide a comprehensive programme of risk management solutions to support and add value to your business.

Our style and aim

Our service offering is global in nature and is always coupled with our desire to become our clients' preferred and trusted partner in the management of risk.

Our experience

HSBC Insurance Brokers brings together skilled and experienced insurance and risk management professionals, wherever our clients' risks or operations may be situated around the world. We constantly strive to find new and innovative ways to make the management of risk and its costs more efficient. We transact significant premium values with the market and this ensures that we achieve some of the most competitive premium rates in the insurance market.

Strength and security

Being a significant part of one of the largest and most successful financial services groups in the world brings security, stability and integrity to our client relationships. We believe this explains why we have one of the best client retention rates in the insurance broking market – something of which we are very proud.

Sector Knowledge

Our experience in the energy, power and utilities sectors is extensive – comprising not only insurance and risk management professionals but sector analysts, researchers and investment bankers, all of whom understand the difficult environment in which many of our clients work. The sector is under constant pressure, from merger and acquisition activity, deregulation, privatisation, environmental controls, contractual obligations and fluctuating fuel prices – to name but a few.

It is with this extensive knowledge that we set about working with our clients to establish the best risk management procedure for them.

Individuality

From traditional risk transfer products to bespoke programmes using our captive management specialists and environmental risk analysts, we are confident that we offer an unique and personal service to all of our clients.
